J.A. MacDonald was a business visitor in Calgary over the week end.

Mr. and Mrs. W. Dixon and family returned on Friday from a motor trip up through the Sylvan and Gull Lake districts and report conditions in that district to be quite prosperous.

J.A. Toombs was a visitor in Drumheller on Sunday.

Jim Ramsay and Frank Ward motored to Pine Lake Saturday, returning Sunday evening, and they reported very good fishing.

S.J. Garrett motored to Calgary and back on Saturday.

Mrs. Torrance and children returned on Friday from Vulcan.

Born, to Mr. and Mrs. A. F. McKibbin, on Tuesday, August 9, a daughter.

Messrs. John McLean, J. Connolly and Hugh Hamshaw motored to Hanna on Thursday.

Mrs. J. A. MacDonald left on Sunday last for a few weeks visit with friends in Medicine Hat.

T.R. and W. Olive motored into Calgary on Tuesday, returning the same day.

The Carbon School Fair will be held this year on Friday, September 9th. All schools exhibiting at this Fair are urgently requested to make preparations accordingly.

The Misses Kate Ramsay and Daphne Nash entertained a number of friends on Thursday evening and a most enjoyable time was had by all those present.

Mr. and Mrs. F. Francis, of Rosetown, Sask., spent the weekend in Carboy.

A number of the Carbon people took in the dance at Swalwell, and others at the Garrett school, last Friday.

Mr. Talbot is the owner of a new Chevrolet Touring car.

Mr. and Mrs. Geo. Wise and family, Lawrence Poxon and J. Manically motored to Calgary on Sunday and returned the same day.

Miss Margaret MacDonald left Sunday for the East.

Mr. and Mrs. P. Edwards motored into Calgary on Sunday. Mr. Edwards returned on Monday, but Mrs. Edwards expects to spend the next week or so visiting with relatives there.

In loving memory of John Garrett who passed away Aug. 3, 1925.

"A bitter grief, a shock severe,
To part with one we loved so dear
Our loss is great, we'll not complain,
But hope in Heaven to meet again"

Ever remembered by his wife and sons.

CURLING MEETING IS POSTPONED

The Curling Club meeting, called for Friday evening in the Municipal Office has been postponed to Monday evening, Aug. 22.

RESULTS OF THE HIGH SCHOOL EXAMINATIONS

(The number after the name indicates the units in which student passed)

GRADE IX—N. Atkinson 2; J. Braden 4; E. Braisher 4; M. Hodgson 3; H. Pimm 1; G. Ramsay 7; C. Wright 6; S. Wright 3.

GRADE X—J. Bishop 6; H. Bramley 4; D. Nash 5; A. Ramsay 8; A. Stephens 4; A. Wallace 5.

GRADE XI—Number of units written, 43; number of units passed, 37; percentage passed, 86.

Percentage passed in high school was 71 per cent.

"Just one more, boys, and then we'll all go home," said the dishwasher as he laid down the soap.

Here and There

Canada's net debt was reduced by \$42,000,000 during the past fiscal year, a reduction in the national debt larger than any in its history.

"The Royal York" is the name chosen by President Beatty for the new Canadian Pacific hotel to be erected at Toronto. It associates the new hotel with the early history of that city.

Canadian Pacific Railway engineers, now busy with their preliminary survey of the projected railway to Chicoutimi and the Lake St. John district, are at present studying the question of a terminus site.

An aviation field available to commercial flying is to be prepared at Lethbridge, Alberta. The new field, which will be wide enough to allow ten planes to lie abreast, will also be used for aerial mail service.

A large party of professional men will leave for a tour of the west over Canadian Pacific lines, on the third annual tour conducted under the auspices of the University of Montreal. The party will spend about two weeks in the Rockies.

The second regular journey to Canada of the Canadian Pacific steamship "Empress of Australia," will be distinguished by the presence on board of that ship of the Prince of Wales and Premier Stanley Baldwin, of Great Britain.

Col. J. S. Dennis, chief commissioner of the Department of Colonization and Development, Canadian Pacific Railway, predicts a much larger immigration movement to Canada this year than last. He explained that the reported congestion of farm workers in the western towns was transient and not likely to recur.

What is said to be the first instance of Canadian-made machinery being shipped out of Canada into the States — manufactured in Canada to American order — is that of nine large wood pulp grinders, of an output of 100 tons of pulp a day, now ready at the plant of the Port Arthur Shipbuilding Co. for consignment to the St. Regis Co., Watertown, New York.

Excellent progress is being made with the branch-line programme projected by the Canadian Pacific Railway for the three Prairie Provinces this season, according to D. C. Coleman, vice-president in charge of western lines. The work of construction, he said, is progressing rapidly and every effort is being made to have the new lines in operation by the time the fall crop movement begins. Keeping pace with the rising tide of land settlement the company expects to open the line from Lloydminster to Clan Donald on July 15. This branch is of particular interest as it serves the colony of Hebrideans located in the Clan Donald district. These settlers are doing remarkably well and have forty per cent. of their land broken.

RESULTS OF THE CARBON STAMPEDE

The Carbon Stampede on Wednesday turned out to be a success, even though hampered somewhat by the rain in the morning. The managers, Gipson and Foster stood up nobly under the strain and put over the events in a manner that was equal to any comparison. There was a good sized crowd in attendance at the grounds and the gate receipts well covered the cost of the undertaking.

Following is a list of the prize winners of the various events:

PARADE—Two oldest cowboys, N. Cunningham and A. Gipson. 4-horse team, E. Maxwell. Old time musician, W. Hay. Old time family, the Hedstroms. Largest family the Charlebois. Decorated saddle horse, Mr. Bassitt. Dressed cowboys, A. Fuller 1st, S. Hay 2nd L. Halstead 3rd. Dressed cow girl, Mrs. Johnson 1st, G. Maxwell 2nd. Boys shetland pony, H. Edwards. Girls shetland pony, Myrtle Oliphant. Oldest bachelor in parade, Joe Turcotte.

I P.M.—Broncho riding, R. Fuller 1st; C. Parge 2nd; B. Coburn 3. Steer riding, J. Bacon 1st; P. Johnson 2nd; McEwan 3rd. Wild cow milking, C. Parge 1st., Bacon 2nd. Barrel race, F. Paget 1st. J. Hudson 2nd. ½ mile ladies pony race, Mrs. McIntyre 1st. Molly Laing 2nd ½ mile Gent's pony race, F. Smith. Manerick race, C. H. Parge. Shetland pony race, M. Oliphant 1st. Wm. Oliphant 2nd.

There were a few other events of which we have not a list of the winners at the time of going to press.

ALFRED FOX TAKES OVER THE CARBON GEM MINE

The Carbon Gem (Bowie mine) has recently been purchased by Alfred Fox and will be operated in future under the Fox Coal Co. Work was commenced on the property last week and it will not be long before large shipments of coal are available for shipment. Owing to the grade of the coal and the market for same, a coal cutter and other modern machinery will soon be installed in the mine.

EXAMINATION RESULTS

Grade VI and Grade VII

Following the letters sent to the pupils of these grades, the Board and teacher wish to announce that all these pupils will be promoted to the next higher grade and that those who failed in three or more subjects will be considered to be on trial for about the first two weeks.

ALEX REID,
Sec. Treas. School Board

COAL RATE DECISION SOON

The Board of Railway Commissioners' decision on the Alberta to Ontario coal freight rate is expected to be published shortly by those intimately connected with the Alberta coal industry. It has been learned from an authentic source that the government expects to receive and deal with the railway Board's report at an early date. All connected with the coal industry are convinced that the rate decided upon will be such that the Dominion Government will have no difficulty in implementing its promise at the last session to put through the necessary order-in-council to make the rate effective.

Uncle Buzz is bored by visitors

Canada's Next Stage Of Development

There are many countries with larger populations, greater accumulations of wealth, and much more highly developed in an industrial sense than Canada, but already this Dominion has achieved fifth place among the commercial nations of the world. Since the war, and more especially during the past few years, the trade of Canada has enormously expanded,—the percentage of growth far surpassing that of any other country.

It is a pertinent question to ask: Can Canada retain for itself the proud position already attained, and is it possible for this Dominion to move steadily forward from fifth place to fourth, to third, and ultimately to the very front rank?

Judged from the standpoint of its geographical position on the world's highway between Europe and the Orient, or judged by the extent and variety of its natural resources, whether of the field, the forest, the mine, the fisheries, and water-powers, the answer can be given by an emphatic affirmative. In all these respects, Canada does not occupy a secondary position to any country on earth.

Canada practically controls the world's supply of such essential commodities as nickel and asbestos. It is now, in its infancy, the world's greatest manufacturer of newsprint and the world's greatest exporter of wheat. It has steadily increased its gold output until now it ranks as the world's third largest producer.

Notwithstanding all these advantages, can Canada ever hope to challenge the position of Great Britain and the United States as the world's greatest commercial nations, and, if so, what is essential to achieve that result?

Not only in order to attain a still higher and stronger position, but to retain what has already been won, it is necessary that Canada should take certain advance steps. Up to the present time this country has been chiefly concerned with those domestic problems and internal affairs involved in the early settlement and development of the country from a raw territory into an organized state. Attention has been devoted to matters of transportation, to the first stages in the development of natural resources, to laying the essential foundations of any country. This pioneer stage is passing. Canada has found itself, and its future now depends upon the place it can make for itself among the nations in finance, in trade and commerce.

The development of our wealth of natural resources must be the basic foundation upon which to erect our future national structure. These resources constitute the Dominion's greatest economic asset, and their development should proceed along the most approved scientific lines in order that there may be a minimum of waste. It is not sufficient that we cut down forests and sell lumber and pulpwood, or that we dig nickel, or asbestos, or gold out of the ground. We must utilize these resources to their fullest extent in the building up of Canadian industry, and, in so doing, also utilize every possible by-product that can be extracted from them.

In Great Britain, the United States, Germany, huge sums are expended annually in scientific research and elaborately equipped laboratories are provided for the prosecution of such work. Great Britain last year expended \$25,000,000 and the United States \$50,000,000 on research. If Canada is to hold its own, and is to go forward to greater triumphs, it must now become equipped in like manner. The expenditure of a few million dollars may easily result in discoveries and improved methods which will yield tens and even hundreds of millions to the Dominion.

Canada is an up-to-date country, but in order to retain that reputation it must follow the most up-to-date methods all along the line. It is not sufficient that goods "made in Canada" or articles "produced in Canada" be good; they must be the very best the world can offer.

Coupled with the maintenance of scientific research, the utilization to the utmost of our own natural resources, and the production of nothing but the best, the industrial and commercial interests of Canada must be alert and unite in the adoption of the most wide-awake and effective selling methods, and create the organization essential to command the confidence of the importing world that all contracts entered into can and will be filled to the letter and on the minute called for.

The proposals which the Minister of Trade and Commerce will, it is understood, submit to Parliament at its next session to provide for important expansions of the activities of the National Research Council, as well as the practical suggestions he has brought with him from England along the line of improved selling and marketing methods, should receive the most earnest consideration of the Canadian people and their whole-hearted support.

Sunburn.

Mix Minard's with sweet oil or cream, and apply. Quick and permanent relief.

W. N. L. 1692

Nature's Gentleman

"Thank you very much indeed!" beamed the well-dressed flapper in the bus as a workman offered her his seat. "That was very kind of you."

The other blushed happily and gave a number of other males a hardy glare as he answered:

"Not at all, miss not at all. I know some men don't give up their seats unless it happens to be a pretty girl, but looks make no odds to me."

And everybody except the young girl smiled.

Supplying Milk For Chinese

Shanghai Company Purchases Cattle In British Columbia

Despite its political troubles and the menace of invading armies, the babies of Shanghai must have milk and British Columbia cows will supply it, as in the past.

For several years the Shanghai Dairy Company has been buying its stock in British Columbia and shipping it across the Pacific to join the big herds quartered in the pastures south of the foreign quarter. It is this company which supplies most of the dairy produce for the use of European families quartered in Shanghai.

G. T. Orchardson and Captain Grant, representatives of the Shanghai Dairy Company, are in British Columbia on another of their buying trips. They are at present in the Comox Valley purchasing dairy stock. They will buy several hundred head this year.

"Wars and revolutions are a nuisance, but there is nothing more insistent than a baby's demand for milk," said Orchardson. "We have got to meet the demand regardless of whatever else may happen."

A WEAK STOMACH

Can Be Strengthened Through the Use of Dr. Williams' Pink Pills

Wonderful is the process by which the chemistry of the body changes the food we eat into blood. And the whole of our well-being depends upon this being maintained day after day, year in and year out. Sometimes the process becomes faulty, and then food begins to poison the blood instead of feeding it. This is followed by all the pangs of indigestion, such as gas on the stomach, pains around the heart, often nausea after eating, and a dislike for all kinds of food.

The only way to overcome these troubles is to tone up the digestion so that you can assimilate all your food. To do this you have only to take Dr. Williams' Pink Pills. A short course of these pills will quickly tone up the stomach and banish indigestion. Here is a bit of convincing proof given by Mrs. Chas. Ladner, Ellerslie, P.E.I., who says:—"For some years I was a sufferer from stomach trouble. Everything I ate caused distress, sour stomach and belching. I could not eat meat or potatoes, and I grew weak and nervous. No medicine seemed to help me until I was persuaded to take Dr. Williams' Pink Pills, and these simply worked wonders. I took the pills faithfully for a couple of months by which time every symptom of the trouble disappeared, and there has not since been the slightest symptom of stomach trouble. No wonder I praise Dr. Williams' Pink Pills."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Western Canada Dairy Convention

The Western Canada Dairy Convention, which includes all dairying interests in the four Western Provinces, will be held in the Hotel Saskatchewan, Regina, from February 7th to 10th next year. This Association will be hosts to both the inter-provincial gathering and the annual provincial dairy convention of Saskatchewan.

Miller's Worm Powders are a pleasant medicine for worm-infested children, and they will take it without objection. When directions are followed it will not injure the most delicate child, as there is nothing of an injurious nature in its composition. They will speedily rid a child of worms and restore the health of the little sufferers whose vitality has become impaired by the attacks of these internal pests.

Million Acres Irrigated

Irrigation is now being supplied to over a million acres of land in the west, according to the Department of the Interior, and surveys are being made of a number of additional projects which should bring the total up to 1½ million acres.

Mothers Value this Oil. — Mothers who know how suddenly crop may seize their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Electric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

Our deepest sympathy is with the man of few words who is married to a woman who does a continuous monologue stunt.

For corns and bunions use Minard's Liniment.

Genuine ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocetate-ester of Salicylic Acid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Radio Entertainers Well Paid

Some Get Hundred Dollars a Minute For Good Music

Does it pay to entertain radio fans? Here are a few figures dug up by the New York dramatic weekly, "Variety":

Toscanini, the Italian composer, who will direct the New York Philharmonic Orchestra on the air, will get \$1,500 for each concert.

Some hours, like the Maxwell, Eveready and Atwater Kent, are said to pay as high as \$100 a minute for a quarter hour of good music. The Ipana Troubadours and Ishman Jones Orchestra will play together at Atlantic City, for half a month, for \$12,000.

Each member of the Eveready Revellers gets \$200 for each hour he's on the air.

Minard's Liniment for scaly scalp.

Decrease In Butter Output

Saskatchewan creameries manufactured 1,661,687 pounds of butter in May. This is a considerable decrease compared with the output for the same month a year ago. The falling off is attributed to the cool weather which prevailed during the period.

Sometimes money talks, but more often it stops talk.

Bravery That Counts

Doctor Going To Africa To Hunt Cure For Sleeping Sickness

A really sporting expedition is that which Dr. Arthur Torrance will make next autumn to Central Africa. Most African hunters go after lions or elephants. There is much danger — to the lions and elephants. With the present type of expanding bullets which blow a hole the size of a man's head in the quarry's body, there is very little danger to the hunter.

Doctor Torrance's hunt will be for something really dangerous. He is going to study the tsetse fly, hoping to find a cure for the sleeping sickness its bite causes.

Many doctors have sacrificed their lives in the study of this plague. May the brave Doctor Torrance not be added to the roll.

Asthma Can be Cured. Its suffering is as needless as it is terrible to endure. After its many years of relief of the most stubborn cases no sufferer can doubt the perfect effectiveness of Dr. J. D. Kellogg's Asthma Remedy. Comfort of body and peace of mind return with its use and nights of sound sleep come back for good. Ask your druggist; he can supply you.

Real glory springs from the silent conquest of ourselves; and without that, the conqueror is naught but the veriest slave.

ALL 'ROUND BETTER THRESHING WITH THE WATERLOO Steel "CHAMPION"

These features of the Waterloo Steel "Champion" give you a lifetime of reliable service. Your threshing will be quicker, easier and better. Strongest frame made in any threshing machine. E. J. ROULEAU, Publisher
Printed every Thursday at Carbon, Alta.
\$2.00 a year

We are back on the job again after a two week's holiday spent at our home in British Columbia and can't say that we feel like working any more than we did before we left. However, the rest didn't do us any harm. Conditions in British Columbia and Alberta in general are no better than they are right here in Carbon, if as good. Everyone is complaining of the slack season, but they are all optimistic of the future. And we are here, or should be. Business in Carbon may look to be at a standstill, but after throughout the country we find conditions much the same everywhere. And we are as well off here as we would be in any other part of the Dominion at the present time. But we can't see it. One always sees where the other fellow is doing so much better than he is, whereas, if we knew of the conditions in that particular district we would be content with what little we have and be thankful that the Lord allowed us that.

A meeting of the Carbon Curling Club and all those interested in the curling in Carbon, has been called for Friday evening, August 19th, at 8 p.m. in the Municipal office, for the purpose of deciding what will be done to promote this sport during the coming winter. Everyone interested in this meeting should attend and give their views on the subject so that we may get started on some plan before the winter sets in. We will need a new rink in Carbon and there will be a certain amount of expense in putting up such a building, but with so many curlers in a town of this size we ought to have something of this nature during the winter. Carbon has been behind the times as far as sports are concerned. Even Swalwell, a much smaller town than this, has a good sized rink, and has been making a go of it. Why can't we do the same here? Let us all get behind this movement of having a curling rink in Carbon this winter and the

project will go ahead without a hitch as long as the citizens are in favor of it, instead of the usual way of knocking everything in the line of sport.

At the time of the recent fires it

Here and There

Air mail service between Winnipeg and Fargo, North Dakota, has been inaugurated and the first mail for Winnipeg from the United States arrived recently.

The Shorthorn bull, King of the Fairies, recently sold from the Canadian ranch of H. R. H. the Prince of Wales to a United States breeder, again won the premier prize at the Calgary Exhibition.

Evidences of the renewal of interest of Old Country investors in Western Canada are seen in a number of recent transactions recorded at Winnipeg, including the proposed erection of three motion picture houses by means of English capital.

Mederic Beauperant, when clearing his farm south of Verner on the Canadian Pacific lines, found a 300-lb. boulder which was half native silver and worth about \$1,200. The discovery has aroused considerable interest among mining men in Cobalt and elsewhere who are arriving in numbers.

London, Ontario, now has an air harbor. Through efforts on the part of the Chamber of Commerce an ideal air-field site has been taken over and, within a month's time, will be completely equipped and marked so as to provide an air depot available to all planes that seek London as a stopping place.

According to a financial statement issued from the headquarters of the Canadian Pacific Railway Company, the gross earnings of the Company for the first six months of the year ended showed an increase of \$3,614,778.06. The net profits, however, decreased about \$900,000 due to a four million dollar increase in the working expenses for that period.

Quebec City lived up to its traditions as the historic gateway and welcomed their Royal Highnesses the Prince of Wales, Prince George and Premier and Mrs. Baldwin with a tremendous burst of enthusiasm and a blaze of color. Vast crowds thronged the docks and waterfront as the Canadian Pacific S.S. Empress of Australia, bearing the distinguished visitors to Canada, steamed into sight.

Experiments in rust prevention by means of spraying chemical over wheat fields from airplanes is about to be tried out in Manitoba, under the direction of the Dominion Government Department of Agriculture. The chemical used is merely sulphur in a colloidal state, technically known as "Cola." It is said that one plane can treat 6,000 acres a day, flying at a height of 50 feet. The machine will carry 700 lbs. of chemical in the mechanical spraying apparatus.

was seen that the fire protection in Carbon is incapable of taking care of the fire situation here. Carbon needs a volunteer fire brigade just the same as any other town in the country. We have the equipment here, but not the organization to use it. What we want is men

who will volunteer to come out to fires and fire practices when such an occasion arises, and said practices should be called frequently. It is the duty of every citizen to volunteer for this work and the time spent on such occasions will probably be well repaid at some future

date. Unless something of this nature is done now, the matter will remain at a standstill and when the need arises for the protection of a home, and it may be your home, there will be no one around who will know what is to be done and done immediately.

Regina's New Hostelry

1. The Library. 2. Tea Room. 3. "Hotel Saskatchewan".

The new hotel was conceived and designed with two considerations always uppermost in the minds of its creators; the maximum of comfort and convenience for its guests and a pleasing architectural effect. With the desired result in mind the architects have developed a design which is singularly pleasing and which will be regarded as one of the most beautiful buildings in Western Canada.

The exterior of the building is designed in Georgian style, the first two storeys above the street being faced with Tyndale stone, quarried near Winnipeg. The main entrance has been treated with Corinthian pilasters.

The Hotel is an eleven-storey building, containing 216 bedrooms with baths, and many beautiful public rooms and administrative offices. Two storeys with space for more guest rooms have been left uncompleted.

One of the most pleasing rooms in the Main Lobby is overlooking the Park. The treatment of this room has a Spanish character, the antique decorated plaster, and large carved fire-place giving it a pleasing effect. The ceiling is heavily beamed and paneled.

The Ball Room, of a George Adams design, is on the first floor, as are also, the Lounge, the Library and the Writing Room.

The mechanical equipment is of the most modern design, all the services being practically self-contained. The hotel has its own refrigeration and electrical generating plant.

The latest addition to the chain of Canadian Pacific Hotels, the "Hotel Saskatchewan," which was officially opened by President Beatty, on May 24, is a modern hotel of a character in keeping with the importance of the Capital City of the Province which furnishes 50 per cent. of the Dominion's wheat output. Regina—"Queen City of the Plains," which has been rapidly developing into one of the great cities of the continent, has long felt the need of a new hostelry. As long ago as 1913 the erection of an hotel was actually started, but when the War came along this project was abandoned, and the unfinished steelwork has remained exposed ever since until it was removed last year. The removal of this old steelwork marked the first step towards the realization so long delayed of Regina's dream of a splendid new hostelry, which has at last been brought about by the enterprise of the Canadian Pacific.

Your Loose Leaf Account Forms

A BUSINESS, no matter how small it may be, cannot afford to be without Loose Leaf Account Forms. They are the recognized book keeping system of today.

WORLD HAPPENINGS BRIEFLY TOLD

Laden with the spoils of their many victories, the greater number of members of the Canadian Hsley team are returning to Canada.

Special despatches from Tomsk say that the Siberian authorities have placed a ten-year ban on sable hunting. Extinction of the animals shortly, if the present intensive slaughter is continued is feared.

His Majesty the King has conferred a knighthood of the Order of St. Michael and St. George upon Dr. W. F. Grenfell, known for his work among the sailors and fishermen of Newfoundland during the past 35 years.

Patrick Belton, who was elected as a Republican for Dublin county and a signer of the protest of Eamon De Valera against the oath to the king, took the oath and his seat in the Dail. There was no demonstration when he made his appearance.

Reports that stray buffalo from the herds moved north from Wainwright have been making trouble in the farming country around Fort Vermilion are to be investigated. Complaints have been made that some 15 animals of the first contingent have mixed with some cattle and destroyed crops near Vermilion.

The Post Office authorities are issuing a warning that all parcels addressed to Great Britain and other countries must be fully prepaid when dispatched from Canada, as postmasters are instructed to see that every effort is made to prevent the mailing of shortpaid parcels to places outside of Canada.

Coal production in Saskatchewan during the first six months of this year exceeded by 7,388 tons the output of the province for the same period of 1926. The official figure issued by the Provincial Labor Department is 194,578 tons. This mark was surpassed in January to July of 1925 by nearly 9,300 tons.

Customer: I want to return this book I bought, "Stories for All Occasions."

Bookseller: What's the matter with it?

Customer: It's a fake! There's nothing there for a man to tell his wife when he gets home at 2 a.m.

Light Pierces Fogs

Rainbow Super-Beacon Light Can Penetrate Mists

Raymond R. Machlett, of New York, son of R. H. Machlett, one of the leading X-ray experts in America in the early stages of its development is demonstrating his rainbow super-beacon light, which penetrates fogs and makes possible airplane landings in bad weather.

The light, produced by devices invented by Mr. Machlett, has been exhibited at Hadley and other aviation fields.

"We have demonstrated that this light can be seen many miles away, perhaps fifty," said Mr. Machlett. "It is a form of electric illumination without a filament. It is a 'cold light,' or produced without appreciable heat, by passing an electric current through rarified neon gas. The color is an unusual orange red, of 10,000 candle power. On very favorable days one at Sandy Hook was seen fifteen miles.

Government agencies are manifesting interest in Mr. Machlett's process and the devices beside them. The Bureau of Standards made a favorable report on the light.

Cairn Unveiled

Where First Party Of Mounted Police Entered Edmonton Over Fifty Years Ago

Unveiling of the cairn in the grounds of Fort Saskatchewan Jail, which marks the site of the original buildings erected in October, 1874, by Col. W. D. Jarvis and 20 non-commissioned officers and men of the first party of Royal North West Mounted Police to enter the Edmonton district, was made recently by Major-General Greisbach, C.B., C.M.G., D.S.O., in the presence of a large gathering of old-time members of the famous force and citizens of the town.

Will Not Have Telephone

The Claims Division of the general government accounting office at Washington has 500 employees and not a single telephone. S. B. Tulloss, chief of the division, says its business is best transacted by correspondence, but his policy has drawn fire from many who criticize the slow methods employed.

To Meet At Moose Jaw

Advice has been received by the Moose Jaw Board of Trade that the Union of Saskatchewan Municipalities has decided to hold its 1928 annual convention in that city.

No earthly tax dodger need hope, for a clear title to a mansion in the skies.

Winnipeg Newspaper Union

To Suit the Needs of the Small Boy

The small boy's suit for play wear may be both practical and manly when fashioned on the lines of the model pictured here, which is made of tan and navy striped duro. It has a round flat collar, and fastens in the centre front with buttons and buttonholes. The back is plain with a drop-seat, and the set-in sleeves may be long or short. The legs are loose at the knees, and an upper and lower patch pocket trims the front. No. 1319 is in sizes 2, 4 and 6 years. Size 4 requires 1 3/4 yards 32-inch material, or 1 1/2 yards 39-inch; short sleeves require 1/4 yard less. Price 20 cents.

Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically, by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents the copy.

Good advice is well enough in its way, but a hungry man can't make a satisfactory meal on it.

SUNDAY SCHOOL LESSON

AUGUST 7

DAVID SPARES SAUL

Golden Text: Be not overcome of evil, but overcome evil with good. — Romans 12:21.

Lesson: 1 Samuel 26.

Devotional Reading: Romans 8:31-39.

Explanations and Comments

I. Saul Seeks David's Life, verses 1-4.—David had taken refuge in the Wilderness of Ziph, and Saul pursued him with three thousand men. Through spies David learned of his coming.

II. David Spares Saul's Life, verses 5-12. David came upon the place where Saul was encamped, and found Saul asleep surrounded by his followers within a barricade made by encircling wagons. David returned to his own men and asked, "Who will go down with me to Saul?" The proposed exploit must have appealed to all of them. Abishai, the son of David's sister, returned with David. They found the king still sleeping within the barricade of wagons, with his spear, the symbol of royal authority stuck in the ground at his head. "God hath delivered up thine enemy into thy hand this day," said Abishai to David, as he begged permission to kill Saul with his own sword. But David forbade. "Who can put forth his hand against Jehovah's anointed and be guiltless?" he asked. There was a sacredness attached to Saul's office, and though David could not honor the man, he could honor the king.

"We honor in our soldiers, not their worth as individuals, but the patriotic valor with which they fulfil their duty; should we not honor in our rulers, whatever their individual worthiness, the offices they represent?"

With a solemn oath, "as Jehovah liveth," David declared that God would carry out his own purpose; Saul should meet his death as God willed, not as he, David, willed; Saul would die by a sudden stroke, or meet his death in battle (as he eventually did; God forbid that he should kill him. "It will be remembered that in the play of Macbeth, Macbeth starts upon his tragic career when the witches suggest to him that he is to be king. In the play the witches stand for supernatural forces. Macbeth can see no way of fulfilling the destiny predicted for him except through violence. The story of David is even profounder in its moral significance than the story of Macbeth. From a source which stood to the Israelites as supernatural, David, too, learned that he was to be king but his spirit was large enough to turn away from the course which to one of the Macbeth type would have seemed the sure road to the fulfillment of destiny."—Bishop McConnell.

Taking the spear which was at the king's head, and the cruse of water as proofs of their visit, the two departed, and no one knew of their coming.

Factory Doctor:—There's nothing wrong with you but laziness.

Third Hand: Wol's the Latin for that, sir, so's I can tell the foreman?

Things Worth Knowing About Firestone Gum-Dipped Tires

Firestone pioneered, developed, tested and placed on the market the Balloon Gum-Dipped Tire—the genuine FULL-SIZED Balloon Tire.

With but half the usual air pressure, these tires are very soft and yielding. They absorb the holes, ruts and bumps in the road. They cushion the car and passengers from shocks and vibration.

Firestone Gum-Dipping—by which each fibre and strand of cord in the tire is impregnated and coated with pure gum—adds the extraordinary strength and flexibility which makes the Balloon construction practical.

Firestone Dealers are kept up-to-date on tire development and service—continually progressing and improving their ability to serve you better and save you money. See the nearest Firestone Dealer and let him handle your requirements.

Grain Exchange Radio Station

Built At Yorkton For Distribution Of Market Prices

Radio Station "CJ.GX." which is being built at Yorkton, Sask., by the Winnipeg Grain Exchange, for distribution of market prices and reports, is now nearing completion. The station building and steel towers have been finished and a studio furnished in the Collacott Block. Engineers of the Canadian Marconi Company are now at Yorkton installing the broadcasting equipment and it is expected that the station will be in operation some time during the second week of August.

With the establishment of this broadcasting station, the Winnipeg Grain Exchange will inaugurate a service of disseminating market prices and information direct to the farmers, in a more efficient way than has heretofore been done in the West. It is understood that in addition to the closing market prices of the day, the opening of the market and mid-session prices will be broadcast as well. The station will also provide musical programmes and other classes of entertainment at regular times on week nights, details of which will be announced later.

Complete in Itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

Has Innate Terror Of Water

Had Noah's Ark sunk a hundred feet before it scraped bottom, man alone of all the animal passengers would have had to exercise an acquired skill to reach shore and safety.

For man alone is incapable until he fights off his innate terror of the water and learns to swim.

Every person drowned through inability to swim is a victim of indifference. The parents, with half an opportunity who do not teach their boys and girls to swim are inviting destruction of the most precious fruit of their living.

Planting a corn is both risky and ineffective. It is much better to use Holloway's Corn Remover and eradicate them entirely.

Neighbor: Why do you whip your little boy? It was the cat that upset the vase of flowers.

Parent: I can't beat the cat. I belong to the S.P.C.A.

CANADIAN FARMERS TO VISIT DENMARK

Canada's first farmers' tour to the old land now being organized by the department of agriculture of the Canadian National Railways, is to go overseas January next. In addition to a tour of England and Scotland,

for a study of agriculture and marketing there, the farmers party will also visit Denmark, for a special study of cooperative marketing in the land of its birth.

The pictures above show scenes in Copenhagen, Denmark's capital,

where the farmers will spend a day or two in sight seeing, and also shows a typical Danish rural scene. During the visit to Denmark the farmers will see the famous people's high schools, and also the co-operative bacon factories.

BETTER SPIRIT NOW PERVADES NAVAL PARLEY

London.—Hope that the tangle arising out of the Geneva naval conference will soon be unravelled is growing in official circles in the British capital. This is due largely to the statement made in the House of Commons by Sir Austen Chamberlain, Secretary for Foreign Affairs, outlining anew the whole British attitude toward the parleys and containing the declaration:

"There need be no difficulty in arriving at a temporary arrangement about the immediate future of cruiser building."

It was this question upon which the negotiations stalled. Sir Austen appeared in Parliament soon after Rt. Hon. W. C. Bridgeman, First Lord of the Admiralty, and Viscount Cecil, the chief British delegates to the naval conference started back for Geneva to re-open the discussions with the United States and Japanese delegates. The purpose of the Foreign Secretary's statement was to put the full weight of the British Government behind the proposals the delegates will make.

A second reason for the statement was to remove the misunderstanding which the British Government believes exists in the minds of many Americans regarding the British aims at Geneva. Although the statement was made at Westminster, and the United States was not mentioned, it was nevertheless admittedly intended for the unseen audience of the people of the United States.

The Foreign Minister informed the Commons that the British Government had even been charged with a desire to destroy the principle of sea power equality as between Great Britain and the United States, established at the Washington conference, and he added emphatically:

"There is no foundation for such suspicion."

He pledged the British Government to complete agreement with the two-fold purpose of the Geneva meeting as outlined in President Coolidge's invitation—reduction of naval expenditures, while maintaining national security.

Preparing For Flight

British Aviators Will Compete For Prize Of £5,000

Dublin.—Col. F. F. Michin, of the British Imperial Airways, and Leslie Hamilton, British air taxi owner, who are in the midst of active preparations for a trans-Atlantic flight, flew from Dublin to Clifden, Galway, to pick out a definite point for their hop off. They hope to leave about the middle of August in a Fokker monoplane.

The latest statement of the flyers' plans show that their first objective will be Ottawa, whence they will fly to London, Ont., and thence back to London, Eng., their desire being to win the £5,000 offered for that feat.

Receive Humane Medals

Hamilton, Ont.—Two westerners have been awarded bronze medals for heroism by the Royal Humane Association, according to an announcement made here. They are Laddie Jason, 14 years of age, Moose Jaw, who rescued two girls from drowning and who, a week before, had rescued a chum from a similar fate and Harvey Capman, for the rescue from drowning of Edith Price at Nanaimo, B.C.

Noted Artist Dead

London.—Solomon Joseph Solomon, noted British artist who called attention to the need of camouflage in modern warfare and initiated it in the British army at the outbreak of the world war, died in London, July 27. He was born here 67 years ago. Among his many works are the decorations in the Royal Exchange and the House of Parliament.

Take Course In French

Quebec, Que.—Eighty women teachers of French, and ten or twelve men, are taking advantage of the new course in Oral French which is being held, for the first time, this year in the Sillery Academy, Quebec City, Department of Education.

Manitoba Wheat Pool

Fourth Annual Meeting Is Held At Brandon

Brandon.—The fourth annual meeting of the Manitoba Co-operative Wheat Producers Ltd., was opened in the city hall. Approximately 380 delegates and thirty-two visitors are registered, making this the largest meeting ever held by the pool.

The membership in the wheat and coarse grain pools July 15 was 18,758. A drive has commenced for renewals of the contracts that will expire in 1928, and while only a small territory has been canvassed, practically all the old members have again contacted as well as 520 new members.

For the 1925-26 crop the Pool operated 8 elevators. This year 30 were in operation and next year about 60 will be run by the Pool. In 1925-26, every unit showed a surplus varying from 1.09 cents to 6.75 cents a bushel; 1926-27 figures are not yet available.

The central selling agency which is the selling body for the three western pools, reports 28 agencies established in 15 different countries, and at present is considering the opening of a London office. The agency, the report states, has made its own market and sells nearly 80 per cent. of its grain outside the ordinary channels.

An Ontario pool has just been organized, with about 8,000 members, and will also sell through the Central Agency.

Wants Land For Air Field

Detroit Airplane Company Asks Newfoundland To Grant Tract

St. John's, Nfld.—The Newfoundland government has been requested to grant a tract of public land near Harbor Grace on the North side of Conception Bay, for purposes of trans-Atlantic aviation.

Fred. Koehler of Detroit, representing the Stinson Aeroplane Company, petitioned the government to grant a piece of land near Harbor Grace to be used for two flying fields. On each site would be established a runway 300 feet wide and 4,000 feet long.

The fields, Koehler said, would be used primarily by the Waco Air Service Company of Detroit, which is sponsoring an attempt to fly around the world in 15 days.

Afterward, Koehler said, the flyers could alight on their East bound journey and also hop off for Europe. The fields would be used in all trans-Atlantic flights in either direction.

The government was considering the application.

Decrease In Value Of Creamery Butter

Although Canada's 1926 Production Higher Than Previous Year

Ottawa.—An important series of reports have been released by the Dominion bureau of statistics, based on statistics showing production in a number of Canadian industries during 1926.

Canada's production of creamery butter in 1926 amounted to 178,156,375 pounds valued at \$62,025,049, an increase in quantity compared with the preceding year, of \$661,408 pounds, but a decrease in value of \$983,948.

Prince Edward Island, Ontario, Manitoba and Saskatchewan record slight increases in production, while the other provinces show decreases.

Gypsum production in Canada advanced to a new high mark in 1926. The total production for the year was 883,728 tons worth \$2,770,813 against 740,323 tons at \$2,389,891 produced in 1925.

Immigrants As Harvesters

Brandon, Man.—It is believed that the settlement of immigrants in this district this year will greatly assist in harvest operations. At the employment bureau here it was stated that Brandon's need this year for the harvest is 2,000 additional men. This is 500 lower than a year ago, but the coming of many immigrants helped solve the situation considerably.

Retail Merchants Association

Saint John, N.B.—J. T. Crowder, Toronto, and Vancouver, president of the Canadian Fair Trade League, was elected president of the Dominion Board of the Retail Merchants Association of Canada here, Regina was selected for the Dominion convention of the board for 1928.

SOVIET ACTIVITY INTOLERABLE TO FRENCH PEOPLE

Paris.—Jean Herbet, French ambassador at Moscow, who recently spent two weeks in Paris, returned to his post bearing instructions that the Soviet government be informed that communist propaganda in France is becoming intolerable to French public opinion, it was learned here.

Although the French foreign office says that M. Herbet was not instructed to make official representations involving both governments in an exchange of notes, official circles are certain that he was to make the Soviet government cognizant in an informal and unofficial manner of the sentiment of the French people and government.

While in Paris the French ambassador to Moscow had conferences with President Doumergue, Premier Poincare and Foreign Minister Briand and also discussed the Russian propaganda situation with prominent personalities of the press, commercial, industrial and banking worlds.

He is said to have left Paris with the personal conviction as well as official advice that France is tired of what it believes to be a connection between the Communist movement in France and the diplomatic mission of Soviet Russia in Paris. He is reported to have informed Foreign Minister Tchitcherine quite plainly that if the Soviet Government entertains hope of coming to an agreement with France on the lines of trade, commerce and industry, the Soviet embassy at Paris must put a stop to its alleged activities here.

To Stage Grand Rally

Conservatives Preparing For Big Convention At Winnipeg

Ottawa.—Manitoba Conservatives are preparing for the Conservative convention to be held in Winnipeg, October 11. A manager is being appointed to carry out a full detailed program, according to advice received at opposition headquarters from General A. D. McRae, M.P., chairman of the national committee organizing for the meeting. Several thousand people from the prairie provinces alone will attend the convention, in addition to the official delegates, states General McRae. Arrangements are being made in the convention hall to accommodate 7,000 people.

Want Tariff Increased

Ottawa.—Application has been made to the United States tariff board for an increase of two cents per pound on the maple sugar duty.

Girl Guides Tour Canada

Over 100 Girl Guides from the eastern provinces and three prominent English guilders, entrained from North Toronto station recently on a special Canadian Pacific train for a tour through the western part of Canada, particularly the Canadian Rockies where the party will make camp at Banff and other famous mountain resorts.

This adventure in the mountains has been uppermost in the minds of the Guides for many months. The feature of their tour will be camps set up at various points in the Rockies, the first at Pentteton and then at Kelowna in the Okanagan Valley.

London Paper Fears Clash Of Popularity

"Truth" Afraid Canada Cannot Avoid Showing Preference For Either Prince Or Premier

London.—Truth, society and financial weekly, in a recent issue, says whoever planned the joint tour of the Prince of Wales, Prince George, and Premier and Mrs. Baldwin to Canada must be singularly lacking in imagination.

"The Prince of Wales is not the Sovereign and Mr. Baldwin is not a Pitt," Truth says, "but it is tactless to say the least about it, to run the risk of a clash of popularity and unsought rivalry between the heir apparent and the Prime Minister of Great Britain. How are the Canadians so to divide their hospitality as to betray no sign of preferring the Prince to the Prime Minister or vice-versa?"

Truth proceeds to declare that in its opinion the tour is a mistake because of the state of Premier Baldwin's health.

"Mr. Baldwin is going to take a 'busy man's holiday' by visiting a country where, in addition to long railway journeys and exhausting public meals, he will be expected to make the most difficult kind of speeches about nothing in particular at every place he visits."

Estimate Number Of Harvesters Required

Approximately 31,000 Will Be Needed For Western Canada

Winnipeg.—Approximately 31,000 harvesters from Eastern Canada and the Pacific coast will be required by Western Canada to garner this year's crop.

This estimate was arrived at at a meeting here of representatives of the railways, the labor bureaus of the three prairie provinces and the government employment services. The first call for harvest help last year was for 58,000 men.

The distribution of imported harvest workers will be 20,000 to Saskatchewan, 8,000 to Alberta and 3,000 to Manitoba.

The first harvest special train will start moving from British Columbia to the prairies about the middle of August and the first from Eastern Canada about September 1.

Life Is Threatened

Dublin.—Eamon de Valera, following the assassination of Vice-President Kevin O'Higgins, received numerous threatening letters and the Irish Free State authorities have placed him under police protection. It was learned here. A plain clothes man accompanies the Republican leader everywhere. Other Republican leaders also received threatening letters.

WORLD POULTRY CONFERENCE IS WELL ATTENDED

Ottawa.—With forty-two countries officially represented, the third world's poultry congress was opened here.

Nearly five thousand people including delegates and members from five continents, were present when Hon. W. R. Motherwell, minister of agriculture for Canada, initiated proceedings. Some forty-two states of the American Union were represented, while all provinces in the Dominion had delegates on hand.

On behalf of the British Empire, His Excellency the Governor-General, Viscount Willingdon, extended a hearty welcome to all international and Canadian delegates. Premier W. L. Mackenzie King, for the Dominion of Canada, greeted the visitors, while Mayor John Ballharrie, Ottawa, presented the key of the city to all members of the International Association of Poultry Investigators and Instructors. President Brown, Hon. William Phillips, United States minister to Canada; W. D. Wilson, Holland, and Prof. Don Castello, Spain, responded to the speeches of welcome.

At the conclusion of the formal opening, Viscount Willingdon was the guest of honor at a luncheon tendered by members of the congress.

Every inch of space in the auditorium was occupied when Hon. W. R. Motherwell, minister of agriculture, as honorary chairman, initiated the proceedings. On behalf of the British Empire, His Excellency the Governor-General, Viscount Willingdon, heartily welcomed the international and Canadian delegates.

Premier W. L. Mackenzie King greeted the visitors on behalf of the Canadian people and a civic welcome was then extended by Mayor John Ballharrie, of Ottawa.

Edward Brown, of London, England, congress chairman, briefly responded to the welcome extended. For the delegates from some 42 states in the American Union, Hon. William Phillips, United States minister, expressed his deep appreciation for the efforts by the Canadian government towards the comfort and happiness of his compatriots, many of whom were visiting the Canadian capital for the first time.

Urge Sales Tax Cut

Resolution Adopted At Convention Of Retail Merchants Association

Saint John, N.B.—The Dominion Board of the Retail Merchants Association of Canada here adopted 20 resolutions. The most important of these asked further reduction in the sales tax, protesting against the reduction in parcel post rates, requested tax on mail order houses, based proportionally on the operating expenses of merchants in the municipality in which they are conducting.

It is urged that such a tax be paid to the government and distributed in proportion to the municipalities. The association pledged cooperation with other organizations with remedying of the price evil on nationally advertised goods and the abolition of the stamp or "balance tax."

Lindbergh Heavily Insured

New York.—"We" are insured for \$150,000 during their tour of the nation. The premium on a policy on Col. Lindbergh's life with his mother as the beneficiary, was \$598.25. Other policies written by four companies are: \$15,000 on the Spirit of St. Louis, if destroyed by fire; \$10,000 for property damage and \$100,000 for public liability. Any aviator may now have his life insured for a special premium.

Automatic Radio For Ocean Boats

London.—All large ocean-going vessels will shortly be fitted with a new automatic wireless alarm apparatus. The apparatus which has been designed by the Marconi Company, will automatically pick up, discriminate, and then call attention to the fact that the vessel is within wireless range for sending out distress signals. This will relieve operators from the necessity of being always at their post.

Comprehensive Plans For Conserving Wild Life In Canada's Vast Northern Areas

Much is being done by the Department of the Interior to organize and explore the vast territories lying to the north of the Prairie Provinces. It is fully realized that development of the natural resources will depend on a robust native population and an abundance of wild life. In conformity with this realization game preserves have been set aside for the sole use of the natives; expert investigators have been detailed to examine and report on wild life conditions; experiments have been conducted with a view to the introducing of new species of animal life; and regulations have been enforced with regard to the destruction of predatory animals. One of the most important experiments has been concerned with the transferring, to the Wood Buffalo Park at Fort Smith, of a large number of buffalo which were surplus to the Watnwright Park, Alberta. The experiment has been watched carefully for three years, and it is now known to have proved a great success.

To the end of 1926 nearly 4,000 buffalo were transferred from Watnwright National Park, Watnwright, Alberta, bringing the herd at Wood Buffalo Park up to over 5,000 animals. The movement for the present year started on June 3, when 150 yearlings, 72 two-year-olds, and 20 three-year-olds arrived at Watnwright, Alberta. Shipments will be made regularly till this year's quota of about 2,000 animals is complete. Park wardens' reports repeatedly state the animals in the Wood Buffalo Park are very well conditioned and this is verified by other officers who have seen herds when travelling through the district.

As these progresses conditions existing in the District of Mackenzie are becoming better known, but to date, although the Wood Buffalo Park covers an area of 17,300 square miles and rich meadows and protecting woods wherein the buffalo can thrive are known to exist, the extent of these and the number of buffalo which can be economically supported have not been ascertained. The area has never been mapped, nor has a single mile of survey been run for this purpose. During the last session of Parliament money was voted for the purpose of undertaking an aerial survey of the park and surrounding district.

Another investigation which is being carried on in the Northwest Territories, with a view to the future development of the Mackenzie District, has reference to the suitability of the area for the support of reindeer. For the purpose of studying this problem the Department of the Interior in 1926 engaged the services of the brothers A. E. and R. T. Forsild, men of wide experience in the Arctic regions and with a broad knowledge of wild life. They are to investigate thoroughly all the conditions relative to the possibilities of introducing reindeer into the Mackenzie basin. Should conditions prove favorable the public investment which will be involved, even in establishing a minimum of 2,000 animals, will amount to a considerable sum of money.

The Forsild brothers spent eight months of last year investigating the underlying causes which have brought about the successful establishment of reindeer in Alaska. They worked down the Yukon river towards its mouth and trekked by dog team to Kotzebue and on to Point Barrow, covering all the country to the south-east of the latter place, and finally reaching Aklavik in March, 1927. During the present year they are working out from the delta of the Mackenzie and will cover the Great Bear Lake district with a view to ascertaining how far the conditions in Mackenzie District compare with those in Alaska.

Chinese Money a Problem

Travellers in China have found the numbers of coins and the rates of exchange an almost unsolvable problem. There are more than 200 different kinds of money, worth different amounts in different provinces. At one time there were 17 mints in the country working 24 hours a day.

Fattening Rabbits

Rations Recommended and Method Of Feeding

Rabbits, like poultry, should not be marketed as meat until they have been fattened, a process that takes from 20 to 30 days. Fattening should be begun at the age of 6 months and for this purpose the rabbits should be placed in small, narrow hutches, in a quiet place, without too much light. In a Dominion Department of Agriculture bulletin on rabbits the following rations are recommended. During the first few days of fattening they should be fed largely on green alfalfa. If available, good soft hay and roots. The green feed should be gradually diminished and replaced by such feeds as mashed boiled potatoes, mixed with bran, barley meal, or corn meal, or stale bread soaked in milk, with an occasional carrot or stick of celery. Feeding should be done three times a day, the noon meal being the lightest and the evening one the heaviest. The noon meal should consist of those elements that excite and whet the appetite. A few feeds of oats should be given the last few days before killing. The root feeds must be served clean without dirt or root hairs adhering, and they should be fed whole, never chopped.

Important Is The Plaited Frock

"The importance of being in earnest"—at least about plaited frocks—is emphasized in this one-piece frock of navy crepe. It is a youthful frock which correctly and distinctively fits many occasions. The long sleeves and narrow string belt tied to create fullness above the hips, indicate its last-minute-ness. There are groups of side plaits extending from the shoulders to hem in front, and one inverted plait in the centre back. The collar is versatile and may be worn high or low. No. 1304 is for misses and small women, and is in sizes 16, 18 and 20 years (or 34, 36 and 38 inches bust only). Size 18 years (36 bust) requires 3 1/2 yards 30-inch material. Price 20 cents.

The secret of distinctive dress lies in good taste rather than a lavish expenditure of money. Every woman should want to make her own clothes, and the home dressmaker will find the designs illustrated in our new Fashion Book to be practical and simple, yet maintaining the spirit of the mode of the moment. Price of the book 10 cents the copy.

Extra Care Needed With Country Radio

Special Grounding Contrivance Necessary To Eliminate Danger From Lightning

The radio owner living in the country has a distinct advantage over his city cousin, as there is no interference from neighboring sets, high tension wires and similar apparatus, which mars the reception of this popular invention in the towns and cities. But the man in the village and on the farm is also at a disadvantage, because if special care is not taken in the installation of the radio, the set may actually prove a menace during electrical storms. With modern fire fighting equipment at his command and with tall buildings and innumerable pipes and wires to carry away lightning charges, the man in town has little to fear from his radio.

The masts which hold up the aerial on the roof, warns Deputy Provincial Fire Marshal George F. Lewis, should never be higher than the terminals of the lightning rod system, and if the building is not rodged, it is a bad practice to have the aerial on the roof of any building. The safest plan is to have these wires strung from masts placed at a short distance from the house. But this precaution alone is not enough, as lightning may strike the aerial, travelling down through the radio set in the house, burning and wrecking everything in its path. To prevent such an accident, country radio users are advised to install a double throw, single pole, knife switch between the aerial and the set. This switch must be of ample size, at least four inches long and the blade half an inch wide. The centre post of the switch is connected to the aerial, and at one end to the radio set and the other to a wire leading outside and down to a good ground connection. When the set is not in use, the switch should connect the aerial with the ground so that lightning would be carried safely around the receiving apparatus. A tag should also be attached to the set, warning people not to use the same during an electrical storm.

"No radio set should be installed without an approved lightning arrester," concludes the Deputy Fire Marshal, "but this piece of equipment should not be confused with lightning rods. The arrester is a simple device for protecting the radio receiving apparatus only."

Demand For Trees

Groves Of Trees Mean Contented Homes In The West

H. W. Lennox, Inspector for the Dominion Forestry Branch at Indian Head, says: "The demand for trees has been insistent from all over the west. This year we have orders for 8,000,000, as against 6,000,000 in 1926." Following his tour of the west, he said: "I find generally a more settled feeling. People are planning for the future. The old days, when farming was a here today and gone tomorrow affair, have disappeared. Farmers are planting trees, and, wherever a grove of trees is found, there you will find contented homes."

No peer comes to the House of Lords with his gloves on when the King is present. He appears unarmed before the sovereign, and in order that it may be made certain that he carries no hidden weapon, his hands are bare.

C.N.R. HONORS LINDBERGH

On the occasion of his visit to Ottawa to attend Canada's Diamond Jubilee Celebration, Col. Charles A. Lindbergh, world famous trans-Atlantic flyer, was presented with a perpetual pass over all lines of the Canadian National Railways in Canada. The pass, which was specially executed in gold and enamel, was presented to Col. Lindbergh by Sir Henry Thornton, Chairman and President of the Canadian National Railways.

Lord Grey On Relations Between Britain And Moscow In The Past And The Future

Circle Egg Marketing

An Excellent Example Of The Value Of Co-Operation

The farming district surrounding Campbellford, Northumberland County, Ontario, provides an excellent example of the value of co-operation. The marketing of eggs on a circle basis began many years ago and had the good effect of inducing the farmers to work together in the marketing of one common product. After a few years growth of membership ceased and interest fell away and, it was largely through the influence of the good work of Mr. F. H. Baker, District Poultry Promoter of the Federal Government, that a re-organization was brought about and a new manager, with good business ability and possessing fine salesmanship, was appointed. That was four years ago when the membership was but 16 in all. The success of this system of marketing soon attracted additional members, who, on receiving the benefits of selling on grade, began to enlarge their flocks and take better care of their birds and deliver their eggs with increasing promptness and care. Farmers now marketing through the Circle number 159, who last year made a gross turnover of nearly \$20,000 in eggs. The growth of this Circle has gone on in a quiet way without canvassing for membership. The system of handling eggs has been improved from time to time. Recently a new style of small egg crates has been introduced for use in automobiles. These are designed to avoid breakage during transit which had hitherto caused annoyance by soiling the cushions and mats of motor cars. The Circle is owned and operated by the producers themselves, who are proud of their system and always ready to have its methods made known to adjoining neighborhoods who are interested in the poultry industry.

White Wild Ducks

New Type Of Feathered Tribe Has Come Into Existence

What is a rare sight in Canada or in any part of the world, a brood of white wild ducks were seen at Brandon provincial exhibition grounds, gaily despoiling themselves at the lake. Expert ornithologists have failed to give a satisfactory explanation for their existence, but there they are, showing that a new type of feathered tribe has come into existence, and that during the last few years.

The story is that about three years ago, R. M. Matheson, K.C., read in a Canadian magazine that J. Lake Morden, of Ontario, had found two white wild ducks in a corner of Lake Ontario and managed to secure them. Mr. Matheson at once wrote to Mr. Morden and had the article verified, was also given the promise that when the time came, a pair of the offspring of the strange birds would be sent on to Brandon. This was done in due course, and the result is the brood of white, wild ducks shown at Brandon.

Hobos are like flannel shirts—they always shrink from washing.

The relations that have existed, and that should exist in the future, between Great Britain and the Soviet government in Moscow were analyzed and discussed in a speech delivered by Lord Grey of Fallodon, the war-time British foreign secretary. Lord Grey recalled what, he said, many forgot. He said it was not the Bolsheviks who upset the Tsar's government. It was Keren-sky, who aimed at establishing a Liberal regime, which has, though, been superseded by another despotism imposed by the Bolsheviks, with greater efficiency, than that used by the Tsar's government.

The Soviet policy is not national, in that it does not promote Russian national interests. It purports to cause world revolutions, on the pattern that has been carried out in Russia. The phrase has not been disowned, "a world-revolution of which Moscow is the head." Here, then, is the difference between the Soviet government and every other government in the world.

The Soviet government is anti-democratic. "Being a dictatorship or despotism, it was anti-democratic and anti-parliamentary. It ruled not by consent, not through parliament, but by force." But the policy of world-wide revolution will fail because it is anti-national. "That was why it was breaking down in China."

Communism must fail, too, because "it was anti-economic." Facts of actual conditions and industrial statistics in Russia cannot be got. "People who went to Russia for short visits, not knowing the language, and were shown what it was thought they should see, had no means of seeing anything more."

"Bolshevism fanaticism was anti-religious," said Lord Grey. "It wished to destroy all religions. The civilization which we valued today had been the outcome of various religious movements. Anything which proposed to scrap the past, to say that religious movements counted for nothing, or that the old ideas of morality and the values which had hitherto obtained as between truth and falsehood should go—any movement on those lines was working to deprive humanity of something to which it would always aspire, and in that way it was bound to fail."

In the future, "our policy should be, so far as the internal affairs of Russia were concerned, to leave them absolutely alone. There were people who said it was a mistake to break with Russia the other day. There was a good deal to be said on both sides; but the thing had been done," and Lord Grey said he hoped "no British government, to whatever party it might belong, would resume relations with Moscow on any footing which was not genuine and sincere. The essence of resuming relations with the Soviet government should be that the policy of world-revolution was professedly and practically abandoned, that the government professed itself, and in practice was, a government pursuing Russian national interests. Let that be the primary condition of any resumption of diplomatic relations with Russia. If they were resumed without that condition being clearly understood and secured, the relations which any government might try to re-establish with the Soviet government were bound to result in deception, disappointment, and failure," said Lord Grey.

Roads Through Indian Reserves

By an agreement between the British Columbia Government and the Federal Government, roads through Indian reserves in the province will be owned by the province. At present they are held by the Federal Government for its wards, the Indians. The arrangement will be ratified formally shortly, following negotiations between Hon. W. H. Sutherland, Minister of Public Works, and the federal authorities.

Only one complete team of horses came safely through the war. In 1914 they went overseas with a battery of artillery. Their last task was to draw the gun-carriage of the Unknown Soldier in Paris. They are now pensioned off.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER V.—Continued

The girls agreed, and so it came about that Helmi Milander got her first invitation to a party. She was in the basement, cleaning out Miss Abbie's fruit cellar, when the invitation came. Two girls both dressed in the pleated skirt and middie she so much admired, stood at the back door asking to see her. Lucy Powers was the speaker, and the invitation was properly given. The only difficulty was in the fact that Helmi did not understand. Miss Abbie received the invitation and undertook to see that Helmi was present.

The basement of Young Methodist Church is the ordinary church basement, reached by a stairway that is worn silvery and gray by the passing of many feet, but to Helmi that September evening when two girls came for her and took her arm to conduct her thither it was a palace of enchantment.

They proceeded at once to the tower room, where small parties were held, and here, due to the decorating committee, opened a scene of loveliness that made Helmi catch her breath. Autumn leaves made of tissue paper ran in festoons from the electric fixtures over the table to each corner of the room. These were the Autumn decorations made by the girls at one of their meetings, and would later be replaced by the Halloween yellow and black cats, witches and pumpkins. A stone crock filled with crimson and purple asters stood in the middle of the table, and from it there went out to each plate ropes of smilax from Lucy Powers' father's greenhouse. A broad band of Autumn leaf crepe paper ran down the middle of the table, and at Helmi's plate was a hand-painted card with the "Beaver and Maple Leaf. On it was printed "Welcome to Canada." The streamers of Autumn leaves above the table made it easy for Helmi with her quick imagination to believe the table was spread in some sunlit glade under the golden and crimson foliage which in a frolicsome velvety wind, might come falling gently down.

The table sparkled with color—salads, ornamented with white and yellow daisies (hard boiled eggs); red flowers and green leaves (petals of beets and leaves of lettuce); platters of cold meat edged with nasturtium leaves, with velvety red blossoms peeping through, and jellies, amber and yellow, showing geometric designs of oranges and bananas securely and mysteriously suspended.

The crowning glory of the table—positive proof that it was a real party—was the high sherbet glass filled with feed orange juice, white grapes

and grapefruit, with a red cherry on top riding at anchor! One at each plate!

Helmi breathed ecstatically as she gazed. Her cup of happiness was full. In addition to the gaiety around her, she had the exquisite rapture of knowing she was suitably dressed. The very day the invitation came Miss Abbie had taken her down town and bought her a pleated skirt, a middie and a red tie. She was dressed just like the others.

Helmi wondered if this is what Heaven would be like. She had some vague ideas on the subject of heaven which had come to her in her busy, crowded life as a child. She believed that is Heaven one's boots would always be new and squeaky; that one would sleep alone, and that one would always feel stylish.

Helmi felt very solemn about coming to the church to eat. It was queer to be asked to have supper at God's house. To Helmi, God was a terrible person, whom people only thought of when some one died, or in thunderstorms, floods, famine or sickness. The God she knew was not concerned about suppers or good times. He looked down with terrible burning eyes, seeing everything from His white throne in the sky, and could wither bad people with one scorching blast. Helmi knew that, for was not Peter Saari found blackened and dead beside his plow, though his horses were not touched, just because he had cheated the storekeeper? And it was a wonder He did not smite Peter's wife and children, too, because they cried so, Peter had been kind to them. Helmi had always thought God had been pretty quick and hard on Peter; but people must not say what they think when it is about God.

And now here she was in God's house for supper, and around her were fifteen girls of her own age, all making her welcome, and everyone as happy as if they weren't at church at all. And they sang some words at first to welcome her, that had her name in them, and they looked at her when they sang:

"How do you do, Helmi, girl, how do you do?"

Is there anything that we can do for you?

We are glad you've come to stay
In this land of work and play,
And we welcome you today,

Helmi, girl!"

Miss Rodgers talked a little then, and the girls all put their heads down, and Helmi knew it was a prayer, and she had queer prickles all over her. Then they began to eat, and by watching the other girls Helmi managed very well. After the fruit cocktail with the cherry (and Helmi's had both a red and green cherry in it), there came scalloped potatoes in a lovely glass dish, and a glass cover, too, with an acorn handle; and cold pork and beef, and pickles, and fresh biscuits that Lucy Powers had made herself at school. Lucy managed to get this over to Helmi through the medium of her meagre English, supplemented by signs. And for dessert there was ice cream, both pink and white, with nuts and cake and cocoa.

And the dishes were beautiful, with green ropes and pink roses, and somehow it seemed to bring God nearer than anything to know He liked pink roses on His dishes. They must have a nice God in Canada!

When the supper was over the girls all stood up and sang with hands clasped. Helmi stood between Lucy and Hattie. The music was strange, the words unintelligible, but the hand-clasp was warm and friendly. Helmi understood it and thrilled with a great new passion. In God's house she had been a guest and had found friends.

The leader presented her with a little Testament and a Blue and Gold Book which had her name in it, right on the front page. Lucy showed her some words and said them to her over and over again, and although Helmi did not know what they meant, she learned to say them, and because these words were vibrant with youth and hope and eager aspirations they fired her young heart with a great desire to live proudly and serve hum-

General Stores

bly. She belonged now, she had her own gang. She wanted to do something for God to show her love for Him, for her new country and these new friends.

Very early the next morning, when the crystal dawn, cool and sweet, was stealing into the sleeping porches on Chestnut Street, there came stealthily a young girl with a scrubbing pail and brush to the locked door. Trying it and finding it locked, she went round to one of the windows in the tower room, the one which had been just above her head. It yielded to her careful touch, and in a moment she and her pail had gone in.

That morning when the janitor came grumbling to his task a strange scene met his eyes. From the tower room arose the damp incense of a well-scrubbed floor, polished windows, shining woodwork—hardy, honest smell, clean soapy, satisfying.

"Maybe I was wrong about them youngsters; they've got some religion after all," he said.

As Helmi went around her work the next day she sang the tune of the song, but she could not quite get the words. Miss Abbie phoned to Lucy Powers to come over and tell her what it was that Helmi was singing. Lucy taught the words to Miss Abbie, who, when the Ladies' Aid met at her house the next week was very proud to have them hear Helmi sing. "She has only been one night at the Club," said Miss Abbie proudly, "and look what she has learned!" Miss Abbie knew very well the minister's sister would think that the girls should have taught her "Abide With Me" or "Sowing in the Morning," or something like that, but she was prepared to tell Miss Terry that times were changing.

(To Be Continued.)

Will Be Great Advantage

Steam Cooled Auto Engines Possible In Few Years

We'll have steam-cooled engines in our automobiles within a few years, is the prediction of Prof. Edward P. Culver, of the Princeton School of Engineering.

There will be no change in the engine, except the transfer of the hose, that enters the present radiator at the top, to the bottom, and the conversion of the radiator from a cooler into a steam condenser.

The greatest advantage of steam-cooling, says Prof. Culver, is it maintains the engine at a constant and most efficient running temperature, no matter what the temperature is outside.

We cannot hear a sound if it has less than about thirty or more than 40,000 vibrations a second.

ECZEMA LASTED TEN YEARS

On Knees, Would Itch and Burn. Cuticura Heals.

"From the time I was a small child I was troubled with eczema on my knees. It broke out in a rash and would itch and burn so that I would scratch it and cause eruptions. My stockings aggravated the breaking out, and I lost my rest at night on account of the irritation. Later it broke out on my arms. The trouble lasted about ten years.

"A friend recommended Cuticura Soap and Ointment so I purchased some, and after using one box of Cuticura Ointment and two cakes of Cuticura Soap I was completely healed." (Signed) Miss Kathleen O'Connell, Port Dufferin, N. S.

Rely on Cuticura Soap and Ointment to keep your skin clear.

Sample Each Free by Mail. Address Canadian Depot: "Stamco Ltd., Montreal." Price, Soap 25c, Ointment 25c and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

History Of Aviation

The Evolution Of Flying From Its First Inception

The first to fly:

—in a dirigible balloon was Henry Chiffard in 1852. It had a three-horse power steam engine.

—in an aeroplane driven by an engine was Orville Wright, on Dec. 17, 1903. He used a 16-horse-power engine.

—ten miles in an aeroplane in Europe was Delagrange on June 22, 1908, at Milan.

—an hour in an aeroplane was Orville Wright, on Sept. 9, 1906.

—over 1,000 feet high was Orville Wright, on Oct. 3, 1909, at Berlin.

—across the English Channel was Bleriot in a monoplane on July 26, 1909.

—across America from the Pacific to the Atlantic, over 4,300 miles, was Rodgers, 1911.

—across the Atlantic in a seaplane was Commander Read, R.S.N., in 1918.

—direct from Newfoundland to the British Isles in an aeroplane were Alcock and Brown, in 1919.

—an airship across the Atlantic were General Maitland and Commander Scott, in the British R34.

—direct from the United States to Europe in a monoplane was Colonel Lindbergh in 1927.

Enthusiastic Over Farming In the West

Representative of Norwegian Government Favorably Impressed With Conditions

Capt. K. S. Irgens, of Oslo, Norway, who made a tour of Western Canada along the lines of the Canadian National Railways as the representative of the Norwegian government, for the purpose of determining the advantages of this country for Norwegian farmers, has returned to the East to pursue his investigations. The captain expressed himself enthusiastically regarding the prosperous and progressive conditions he found wherever he went, and took away with him favorable impressions of the West generally. He is likely to desert the sea for a farm somewhere in one of the Western provinces. He met many of his countrymen during his trip, and everywhere found them doing well and very contented with the land of their adoption.

The Greatest Investment

World Buys On Information Obtained From Newspaper Advertising

Investments in newspaper advertising last year amounted to \$235,000,000. That was a gain of \$15,000,000 over the previous year. Big figures, those. But remember that the world buys on information. It travels because it knows when and where and how—through advertisements. It builds because it knows how—through advertisements. It dresses through thoughts suggested by advertisements. And so on through the activities of life. Think of what the world would be without newspapers. Think of what the newspapers would be without advertisements. Great is advertising, and the greatest of all advertising is newspaper advertising. —The Fourth Estate (New York).

Minard's Liniment for burns.

For Restless Babies

Warm weather is a trial to both mother and babe and the task of keeping the little one in perfect health is often very difficult. Probably the matter of proper food for the infant is of greatest concern to the average mother.

If you cannot nurse baby and it does not gain upon the breast milk give him Borden's Eagle Brand Milk—the food that has successfully reared hundreds of thousands of babies. Easy to prepare—just add boiled water as directed.

In this paper from time to time you will find an advertisement of Borden's Eagle Brand Milk, a food that has raised more healthy babies than all the prepared infant foods combined. Cut out the advertisement and mail it to The Borden Company Limited, Montreal, and they will send you, free of charge, instructions for feeding your baby, and a Baby Welfare Book and Baby Record Book. Or, just write the Company mentioning this paper and they will be sent.

Minard's Liniment for cuts and bruises.

Little Helps For This Week

Teach me to do Thy will, for Thou art my God.—Ps. cxlvi. 10.

Small service is true service while it lasts.

Of friends, however humble, spurn not one.

The daisy, by the shadow that it casts,

Protects the lingering dew-drop from the sun.

—William Wordsworth.

We can all be servants of God wherever our lot is cast; but He gives us different sorts of work, according as He fits us for it and calls us to it.

—George Eliot.

Service is our destiny in life or in death. Then let it be my choice, living to serve the living, and be fretted uncomplainingly. If I can assure myself of doing service, I have my home within.—George Meredith.

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera, infantum and diarrhoea carry off thousands of little ones every summer. In most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the new-born babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Produced In Every Province

Alfalfa can be grown over the widest range of climatic conditions of any legume yet grown in Canada. It is now being produced in every province from the Atlantic to the Pacific.

It Testifies for Itself.—Dr. Thomas' Electric Oil needs no testimonial of its powers other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, will know that the medicine proves itself and needs no guarantee. This shows why this Oil is in general use.

Millions From Cowdry Estate

Eight million dollars will go to the Exchequer as death duty on the \$20,000,000 estate of Viscount Cowdry, who died in London, May first.

DYSENTERY WAS SO BAD BECAME ALARMED

Mrs. Wallace Pepper, R.I. No. 6, Simcoe, Ont., writes:—"Last summer I was very bad with dysentery. I lost my appetite, and had such severe pains in my abdomen they made me very faint. I passed blood which greatly alarmed me, so I hurried to the doctor. He told me the quickest way to get rid of it would be to take

"I took only part of a bottle and was completely relieved. I feel I cannot recommend it too highly."

This wonderful bowel complaint remedy has been on the market for the past 80 years; put up only by The T. M. Burton Co., Limited, Toronto, Ont.

RESTORED TO GOOD HEALTH

Mother of Eleven Children Praises Lydia E. Pinkham's Vegetable Compound

Her Interesting Experience

Buckingham, Quebec.—"I am the mother of eleven living children, and my baby is five months old. I am only 38 years old and I have taken Lydia E. Pinkham's Vegetable Compound for weakness and my nerves. I knew of it from my sister, Dame Edouard Beilefeuille of Ramsayville. For five years I was in misery and was always ready to cry. Now I am so happy to have good health. My daughter, who is 18 years old, has also taken it and will be happy to recommend it to all young girls."—DAME WILLIAM PARENT, Box 414, Buckingham, Quebec.

Why suffer for years with backache, nervousness and other ailments common to women from early life to middle age, when Lydia E. Pinkham's Vegetable Compound will give you relief?

In a recent country-wide canvass of purchasers of Lydia E. Pinkham's Vegetable Compound, over 250,000 replies were received, and 98 out of every 100 reported they were benefited by its use.

The Most **Amazing**
Quality
in Chevrolet History

QUALITY in design. Quality in con-
struction. Quality in appearance.
Quality in performance. Never before
has any low-priced car possessed them to
such an amazing degree—because no other
low-priced car combines the progressiveness
of Chevrolet and the diversified experience,
the vast resources and the matchless facilities
of General Motors.

Study today's Chevrolet. Mark well the aris-
tocratic beauty of its lines—the superbly
executed details of its Fisher-built bodies.

Then go for a ride. Revel in the thrilling
spurt when you "step on the gas". Delight
in the smooth operation—the swift sweep of
the passing miles. Marvel at the way the car
hugs the road, the ease with which it obeys
the steering wheel, the promptness with which
it responds to the brakes.

Here is quality expressed in terms that mil-
lions now can understand and enjoy. Here
is quality obtainable at New, Lower Prices,
which reflect the savings of tremendous pro-
duction and which demonstrate the willing-
ness to share these savings with the public. . .
Here is a car of amazing quality . . . for
everybody, everywhere. C-328C
